## TABLES DES MATIÈRES

## FASCICULE 1, AVRIL 1969

1. Effects of chronic fastigial lesions on the sleep-wakefulness rhythm in the cat. E. GIANNAZZO, T. MANZONI, R. RAFFAELE, S. SAPIENZA and A. URBANO . . . . .	Pag. 1
2. Transmission of labyrinthine volleys through the vestibular nuclei during sleep. G. L. LENZI, O. POMPEIANO and T. SATOH . . . . .	19
3. Role of the spinal cord in compensating the effects of hemilabyrinthectomy. G. B. AZZENA . . . . .	43
4. Pyramidal influence on the spinal trigeminal nucleus of the cat. M.-C. HEPP-REYMOND and M. WIESENDANGER . . .	54
5. Do cat spinal motoneurons receive direct supraspinal fibre connections? A supplementary silver study. R. NYBERG-HANSEN . . . . .	67
ANALYSES . . . . .	79

## FASCICULE 2, JUILLET 1969

1. Electrophysiological investigations on the pathways from cerebral cortex to the anterior lobe of cerebellum. L. CERVETTO, G. F. MARCHESI and P. STRATA . . . . .	Pag. 85
2. Étude des composantes intracorticales tardives de la réponse de l'aire visuelle du chat à une volée d'influx afférents. I. Propriétés caractéristiques des potentiels intracorticaux. Étude stratigraphique et action de divers facteurs. V. BONNET et R. BRIOT . . . . .	105
3. Étude des composantes intracorticales tardives de la réponse de l'aire visuelle du chat à une volée d'influx afférents. II. Signification fonctionnelle des potentiels intracorticaux tardifs. Étude d'un mécanisme de facilitation de la réponse de l'aire visuelle. V. BONNET et R. BRIOT . . . . .	136

4. Sympathetic influences on the dark-discharge of the retina in the freely moving cat. G. G. MASCETTI, C. A. MARZI and G. BERLUCCHI . . . . .	Pag. 158
5. Changes in resting activity of retinal ganglion cells produced by electrical stimulation of the cervical sympathetic trunk. G. G. MASCETTI, C. A. MARZI and G. BERLUCCHI . . . . .	167
6. Sleep and instinctive behavior. G. MORUZZI . . . . .	175
ANALYSES . . . . .	217

## FASCICULE 3, AOÛT 1969

1. Dissociation of electrocortical activity and somatic reflexes during rabbit hypnosis. G. CARLI . . . . .	Pag. 219
2. An electrical investigation of the efferent pathways from the vestibular nuclei. W. A. COOK jr., A. CANGIANO and O. POMPEIANO . . . . .	235
3. Dorsal root potentials in the lumbar cord evoked from the vestibular system. W. A. COOK jr., A. CANGIANO and O. POMPEIANO . . . . .	275
4. Vestibular control of transmission in primary afferents to the lumbar spinal cord. COOK W. A. jr., A. CANGIANO and O. POMPEIANO . . . . .	296
5. Primary afferent depolarization in the lumbar cord evoked from the fastigial nucleus. A. CANGIANO, W. A. COOK jr. and O. POMPEIANO . . . . .	321
6. Cerebellar inhibitory control of the vestibular reflex pathways to primary afferents. A. CANGIANO, W. A. COOK jr. and O. POMPEIANO . . . . .	341

## FASCICULE 4, OCTOBRE 1969

Muscle spindles in the lumbrical muscle of the adult cat. Electron microscopic observations and functional considerations. N. CORVAJA, V. MARINOZZI and O. POMPEIANO . . . . .	Pag. 365
--	----------

## FASCICULE 5, DÉCEMBRE 1969

1. Introductory statement about the thalamo-cortical connections. G. MACCHI . . . . .	Pag. 547
2. Residual neurons of the thalamic ventrobasal nuclei. A histological and electrophysiological study in the cat. M. CARRERAS, A. LECHI, A. ZAMPOLLO and G. JUVARRA . . . . .	570

3. Relationships between the somatosensory thalamic relay-nuclei of the two sides. E. FADIGA and T. MANZONI . . . Pag. 604
4. Effects of chronic thalamic lesions on the electrical activity of the neocortex and on sleep. F. ANGELERI, G. F. MARCHESE and A. QUATTRINI . . . . . 633
5. Presynaptic and postsynaptic changes in specific thalamic nuclei during deep sleep. N. DAGNINO, E. FAVALE, C. LOEB, M. MANFREDI and A. SEITUN . . . . . 668
6. Thalamic influences on the olfactory bulb as revealed by induced d. c. potential changes. Anatomico-functional correlations. M. MANCIA, M. CARRERAS, D. MANCIA and A. RUSTIONI . . . . . 685
7. Ascending and descending connections of the insular cortex of the cat. G. AVANZINI, D. MANCIA and G. PELLICCIOLI . . 696
8. Specific and non-specific components in the activity of a relay nucleus: the lateral geniculate. A. ARDUINI . . . . . 715
9. Étude topographique et stratigraphique des projections du corps genouillé latéral sur le cortex cérébral. R. MARTY, O. BENOIT et M. M. LARGUIER . . . . . 723
